## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 4-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In line 3 of claim 4, the term "and" should be replaced with --or-- because R" group should be the members in the selective group in alternatives only.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined

Art Unit: 1713

under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Jorgensen (6,617,405).

Jorgensen teaches a gas phase ethylene polymerization process in a fluid bed reactor system in the presence of spray dried Ziegler catalyst prepared by (i) mixing magnesium and titanium tetrachloride in THF to provide a catalyst precursor solution, (ii) adding silica filler to the catalyst precursor solution to form a slurry, (iii) spray drying the catalyst precursor slurry in nitrogen gas at temperature ranging from 140 to 100 °C to provide discrete catalyst precursor particles, (iv) mixing the discrete catalyst precursor particles in mineral oil, and (v) activating the catalyst precursor particles with tri-n-hexylaluminum in mineral oil before introducing the catalyst to the gas phase reactor, and (vi) conducting ethylene polymerization in the gas phase reactor (col. 3, lines 8-42; col. 6, lines 15-63; col. 11, line 10 to col. 12, line 13; and Examples 1-5).

Jorgensen's teaching meets all of the limitations of the instant claims.

5. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Jorgensen et al. (6,187,866)

Analogous rejections as shown above are also applied to Jorgensen et al. (6,187,866); see at least col. 2, line 65 to col. 3, line 32, col. 6, lines 29-50, col. 7, lines 16-20, and Examples 1-8.
